

AjoLedger

Coordinator Guide v1

Complete guide for circle coordinators · June 2026

This guide covers everything a coordinator needs to create, manage, and complete a savings circle on AjoLedger. AjoLedger supports five circle types: Rotating Ajo, Contribution Pool, Welfare Fund, Graded Cooperative, and Thrift & Loan.

Part 1 — Getting Started

Creating Your Account

Visit ajoledger.ng and click "Create account." Enter your full name, phone number, and a secure password. Accept the Terms of Service and Platform Disclaimer. Your account is created immediately.

Verifying Your NIN

Go to Profile → Identity Verification. Enter your 11-digit National Identification Number (NIN). AjoLedger verifies your name against the NIMC database via Prembly. Verification usually takes under 30 seconds. NIN-verified coordinators display a verified badge on their profile.

Coordinator Dashboard Overview

Your dashboard shows: all your circles with status, pending actions (contributions to confirm, loan applications to process), total members across all circles, and quick access to create a new circle. Each circle card shows the current cycle, next contribution date, and member count.

Part 2 — Creating a Circle

Step 1 — Choose Your Circle Type

Circle Type	Choose this if...
Rotating Ajo	Every member takes turns collecting the full pot. Classic Ajo/Esusu format.
Contribution Pool	Saving toward a shared goal. You as coordinator disburse when ready.
Welfare Fund	Members can apply for emergency draws. Others vote on each application.

Graded Cooperative	Members hold different numbers of shares. Proportional contributions and payouts.
Thrift & Loan	Members save together and can apply for loans from the pool.

Step 2 — Set Circle Parameters

Enter the circle name, contribution amount, contribution frequency (weekly/bi-weekly/monthly/quarterly), and number of cycles. For Rotating Ajo, the number of cycles must equal the maximum number of members. Set the start date and whether NIN verification is required for members.

Step 3 — Pay the Activation Fee

Review the activation fee calculated based on your circle parameters. The fee is a one-time charge — there are no monthly fees during the circle's active period. Payment is via Paystack (card, bank transfer, or USSD). The circle activates immediately upon successful payment.

Step 4 — Invite Members

After activation, you receive a unique circle invite link and a 13-character circle code. Share the link via WhatsApp, SMS, or any channel. Members follow the link, create or log into their AjoLedger account, and join. If you set NIN verification as required, members must verify before joining.

Part 3 — Managing an Active Circle

Recording Contributions

When a member pays their contribution, go to the circle → Contributions → Record Payment. Select the member, confirm the amount, and optionally upload proof of payment (screenshot of transfer). The contribution is recorded in the ledger immediately and a WhatsApp notification is sent to all members.

Confirming Collection (Rotating Ajo)

When the pot collector is due to receive, the coordinator manages the full disbursement process. The collector's bank details are visible only to the coordinator. The coordinator collects contributions from members through group's normal payment method, then transfers the full pot directly to the collector.

Once the coordinator has disbursed the pot, they log in and click "Confirm disbursement" — recording that the pot has been sent. The collector then logs in and clicks "Confirm receipt" to acknowledge they have received the funds. After this two-step confirmation, coordinator can close the current cycle which opens the next one automatically. A WhatsApp notification is sent to all members confirming the cycle is complete.

Processing Welfare Draw Applications

A member applies for a welfare draw from their dashboard with a stated reason and amount. You and all members receive a WhatsApp notification. Members vote to approve or decline. Once the voting threshold is reached, you disburse the amount directly to the member and confirm on AjoLedger.

Processing Loan Applications (Thrift & Loan)

A member applies for a loan stating the amount, purpose, and proposed repayment period. Members vote. If approved, you disburse directly to the member and confirm on AjoLedger. The repayment schedule is tracked automatically. A member's reputation score is affected by repayment timeliness.

Managing Member Issues

Late payments: the system flags late contributions automatically. Members lose reputation points for each late or missed payment. You can send a WhatsApp reminder directly from the member's profile on AjoLedger. For persistent non-payers on Thrift & Loan circles, you can flag a member as a defaulter — visible to all members.

Part 4 — Completing and Renewing a Circle

Closing a Completed Circle

When the final cycle is completed and all members have collected (or funds have been distributed), the circle status changes to "Completed." Review the final summary — it shows total contributions, total disbursements, and the full audit trail. Download the summary as a PDF for your records.

Renewing a Circle

From the completed circle, click "Renew circle." The circle parameters are pre-filled from the previous circle. You can adjust any parameter before activating. Your 10% loyalty renewal discount is applied automatically to the activation fee. The member invite link changes for the new circle.

Part 5 — Troubleshooting

Issue	Solution
Member says they paid but it's not recorded	Ask them to send their payment screenshot. Record the contribution and upload the screenshot as proof. The audit log will show you recorded it manually.

Wrong amount recorded for a contribution	Contact support@ajoledger.ng immediately. Coordinators cannot edit posted contributions to maintain ledger integrity. Support can correct errors with evidence.
Member joined but needs to be removed	Members can only be removed before the first cycle starts. After the first cycle, contact support. Removing a mid-circle member requires closing the circle.
Circle code not working for a member	Check the code is 13 characters. Codes are case-sensitive. If expired, generate a new invite link from the circle settings.
WhatsApp notification not received	Check the member's phone number is correct on their profile. Notifications require an active internet connection on the recipient's phone.
Payment failed at activation	If payment was deducted but circle did not activate, contact support@ajoledger.ng with your Paystack transaction reference. Refund or manual activation within 24 hours.

Support

Channel	Contact	Hours
WhatsApp (fastest)	+234 901 298 4122	Monday to Saturday, 9AM to 6PM Lagos time
Email	support@ajoledger.ng	Response within 24 hours on business days
